Culture Suggestions

Work soil at least 18 inches deep; use liberal amount of well decayed manure. Cow manure is best. Use sprinkling of lime and bone; Soak seed in water for about 24 hours or until swelled up and then plant about 1½ to 2 inches deep in a well firmed soil that is good and moist, but not sticky. (DO NOT SOAK WHITE SEEDED VARIETIES).

In recent years a copper oxide preparation has frequently been dusted on sweet pea seeds to prevent damping off, the same proving very satisfactory. This can be procured at most seed stores under various names. Inoculation of seed is also highly successful.

Peas will not do well in too loose a soil. Plant one inch apart and later thin to about six inches. Do not water until seeds have begun to germinate. After germination has taken place give a good soaking. **MOST FAILURES ARE CAUSED BY WATERING BEFORE SEED HAS SPROUTED.** If weather is hot use some kind of shading. Protect young plants from birds outdoors. Look for Green Aphids regularly as this insect is the worst enemy. Spraying with nicotine, one part nicotine to 400 parts water with spray gun is best. There are also many other good insecticides which are excellent for the control of Aphids. Give young plants substantial supports in order that they may climb and produce good flowers. Poor flowers with crooked stems are worthless. Liquid manure feeding after they come in bloom will lengthen the flowering period and produce better flowers. Pick all flowers as this also lengthens the flowering period. Always keep the surface earth loose and never allow a crust to form. If grown indoors keep ventilators open to keep the air as dry as possible. A house that is kept damp and sultry will cause too much growth and the sweet peas will not bloom as soon as they should, and then will begin to bloom too high up. Early sweet peas usually bloom from 75 to 100 days after seed is planted.

Conditions of Sale

Send your orders as soon as possible after receiving catalog to insure prompt delivery. Orders are filled the same day as received and we exercise the utmost care in filling orders.

Owing to the handling of other flower seed not raised by us we are compelled to use the seedsman disclaimer.

WILLIAM ZVOLANEK & CO., give no warranty, expressed or implied as to description, quality, productiveness or any other matter of any seeds we sell and we will not be in any way responsible for the crop. If purchaser does not accept seed on these terms they are to be returned immediately and the money paid for same will at once be refunded.

Any questions in regard to growing will be cheerfully answered. In case of shortage or crop failure we will take the liberty of substituting with the best and nearest color. If this is not wanted, mark your order "No Substitute."

Terms

A 6% discount will be allowed on all orders with remittance enclosed and all such orders will be sent post-paid to any part of the postal union, or Canada. Orders not accompanied with remittance, postage will be added and if party is not known will be sent C. O. D., unless other arrangements are made in advance. To insure delivery of foreign orders, postal money order should accompany order with postage added or we cannot be held responsible for delivery. **ALL FOREIGN ORDERS MUST BE AT PAR WITH U. S. CURRENCY.**

If you wish seed to be sent via airmail allow extra for postage, 1 oz. 12 cents; 4 ozs. 28c; 8 ozs. 56 cents; 1 lb \$1.08. This is on account of the extra packing which makes same over-weight.

Just A Few Lines!

We specialize in producing high class sweet peas for the florist and commercial grower, the most critical class of growers. SWEET PEAS GOING OUT UNDER THE NAME OF WILLIAM ZVOLANEK & CO., IS THE BEST AVAILABLE.

Good sweet peas must first of all have good long stems, well placed flowers three to four on a stem and plants must be vigorous. Our Reddick type is the last word on all these points, especially the very long stems, always so much in demand. Flowers with short stems always bring lower prices and usually are tossed aside in markets in preference to well bred strains with the longer stems. Our long stem strains will give you satisfaction if chosen from our Reddick type.

Many letters received from our customers of which we herewith print a few at random prove our strains are the best available and at the same time we know they are satisfied.

LATE SUMMER FLOWERING SWEET PEAS

Heretofore we have not listed the late summer flowering sweet peas but in recent years we have developed some extra fine new varieties of this summer flowering type and have decided to list them with a few of the better known varieties to fill in the range of colors. These sweet peas will not bloom in the winter months. Please do not order them for winter flowering. They should be planted in December or January, where possible outdoors and they will bloom early in the spring. Or they should be started indoors where it is too cold and transplanted outdoors just as soon as danger of freezing is over.
